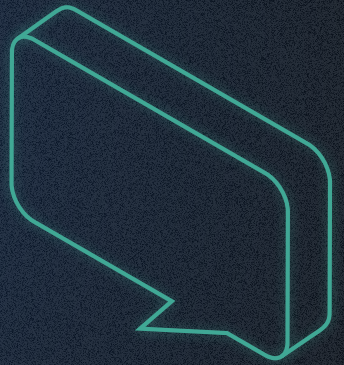
Unlock Rewards with ORBIT Swap Ranks

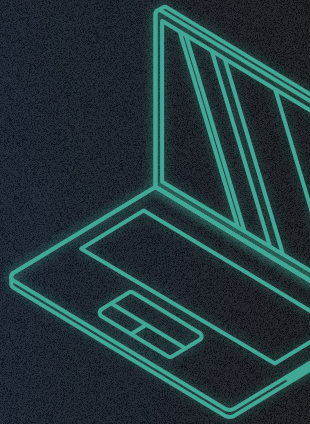
- Earn more by climbing the ranks within the ORBIT Swap ecosystem.
- The higher your rank, the more you earn from your team's staking profits.



Question:

How Do Ranks Work in ORBIT Swap?

Your rank is determined by the group volume of your team and the number of direct sponsors you have. The higher your rank, the larger percentage you earn from your group's daily staking profits.



What is Group Volume?

Group Volume refers to the total amount of funds (in USDT or equivalent tokens) that your downlines has collectively staked in the ORBIT Swap platform. This includes the staking contributions of all members in your downline (team) across multiple levels.

What is Daily Staking Profit?

Daily Staking Profits are the daily returns or earnings claimed by you or your team members. These profits are based on the specific staking plan chosen and are calculated as a percentage of the staked amount. In a referral system, you can earn a portion of your downlines' daily staking profits based on your referral level and rank.
